

# **GLOBAL MEDICAL EDUCATION COURSE**

## **“Antimicrobial Resistance and Immigration Health”**

 January 29 - February 2, 2024     4:00 - 7:00 PM     Microsoft Teams

## Course Overview

Explore the intersection of two critical healthcare challenges – Antimicrobial Resistance (AMR) and the healthcare barriers faced by immigrant populations. This comprehensive course provides 3rd year medical students with insights into the complexities of healthcare disparities and AMR in vulnerable communities.

**Course Duration:** 5 Days

**Course Dates:** January 29 – February 2, 2024

**Course Delivery:** Online

**Course Timing:** 4:00 PM to 7:00 PM (Abu Dhabi Time)

## Course Goals

The course provides:

- In-depth understanding of AMR mechanisms and global implications
- Analysis of real-world case studies involving immigrant health
- Interactions with subject matter experts in infectious diseases, migration studies, and more
- Engagement and interactions with medical students from different countries
- Application of knowledge through case discussions, presentations, and assignments
- Reflection on ethical considerations in treating vulnerable populations

## Course Learning Objectives

By the end of this course, you will be able to:

- Identify the mechanisms and consequences of antimicrobial resistance
- Determine challenges faced by immigrants in accessing healthcare
- Apply knowledge to diagnose and treat illnesses in immigrant populations
- Consider ethical implications in treating vulnerable patients
- Reflect on the broader global impact of AMR and healthcare disparities
- 

## Who Should Attend

3<sup>rd</sup> year medical students interested in global health and infectious diseases, seeking insights into immigrant healthcare challenge, and passionate about addressing the critical issue of antimicrobial resistance

## Course Highlights and Format

- Expert lectures and interactive discussions
- Real-world case studies and practical assignments
- Group activities and collaborative learning
- Final presentation on a comprehensive case study

## Key Takeaways

- Comprehensive understanding of AMR and its impact on healthcare
- Ability to diagnose and treat illnesses in immigrant populations
- Ethical insights into treating vulnerable patients
- Strategies to address AMR and healthcare disparities on a global scale

## Registration

- Kindly submit your applications thru the link mentioned below and if you have any inquiries regarding this course, you may contact us at [clinicaltraining@clevelandclinicabudhabi.ae](mailto:clinicaltraining@clevelandclinicabudhabi.ae)
